Operations Systems

WINDOWS (not preinstalled)

Downloading the official installer (.exe) from python.org. (It is mandatory to check the 'Add Python to PATH' box).

MACOS(preinstalled)

Try to download or have a version $\geq$3. Download the package or archive that ends in 'pkg' in python.org.

LINUX(preinstalled)

Try 'sudo apt install python3 python3-pip python3-venv if you don't have a version $\geq$3

Integrated Development Environment(IDE)

A complete software that make your "program experience" a lot nicer.

- Write your Python programs.
- A way to see lines of code, before running your program.
- A way to try and step through your code line by line.
- A console to interact with the user of your programs.

Some Famous IDEs

- VsCode
- Pycharm
- Spyder

Console

python –version: your current python version.

pip –version: the version of your package manager.

TRY..

1.- 6<7

2.- print (0)

3.- 7*0+4

4.- print ("hello world!")
